

CHARGESPOT
CONNECT.PUBLIC
**THE CHARGING
STATION FOR
PUBLIC SPACES**

THE CLEVER WAY
OF CHARGING

CHARGESPOT CONNECT.PUBLIC. THE BENEFITS FOR YOU.

Smart charging on the road

This is now an option everywhere – outside supermarkets, in car parks, at filling stations, in lay-bys and outside restaurants. Chargespot connect.public is a smart charging station for public spaces. Charging authorisation and billing at the charging point are managed via an RFID charging card or a smartphone app on a digital device.

Safety information for proper use.

The Chargespot connect.public charging station is intended for use in private, semi-public and public settings such as private property, company car parks, depots or public car parks. The charging system is exclusively designated for stationary installation and is suitable for outdoor installation.

Who is Chargespot connect.public suitable for?

It is ideal for anyone who sees electric mobility as a service for their customers and wishes to make the most of an additional source of income.

Charging technology made in Germany

The brand HEIDELBERG has stood for quality and sustainability in the global printing industry for more than 170 years. But we are also making an impression in the field of electric mobility with innovative, customer-oriented solutions. We have now given our activities in this area, which we have been engaged in since 2014, a name – AMPERFIED. The wholly owned subsidiary founded in April 2022 stands for smart charging technology made in Germany, and aspires to being a trustworthy and reliable partner on the way to the future of electric mobility.

Simultaneous charging of two electric vehicles

CHARGESPOT CONNECT.PUBLIC – HOW IT WORKS

01

Initiating the charging process:

1. Insert the plug into the grey ring and turn approximately 60 degrees to the left.

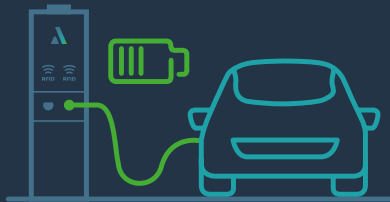

The charging process starts.

02

2. Hold the RFID charging card up to the identification field.

03

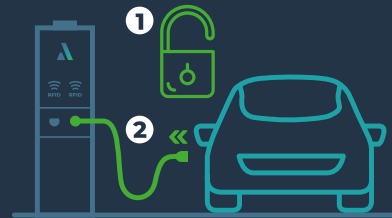

Stopping the charging process:

3. Open the vehicle.

The charging process stops.

04

4. Remove the plug from the power socket.
